

ELECTRICORD ELECTRICAL ACCESSORIES

PRO-GRADE

Industrial-Quality Cord & Accessory

Built for the contractor, these products are made to handle the rigors of the most demanding job site. We are so confident that PRO-GRADE cords are the best vinyl cords available, we even back them up with a lifetime warranty.

MAXIMUM DURABILITY

We set out to build products that have the durability to handle the abuse of construction job sites and other serious work environments. With a high-grade, water-resistant jacket and durable fiberglass insulation over 100% copper wire, PRO-GRADE cords fit the order. In the long run, it can be cheaper to buy quality cords that are made to last, and with our lifetime warranty, your customers can buy these cords with confidence.

MAXIMUM FLEXIBILITY

When the cold weather hits, there's nothing worse than a stiff, tangled extension cord. PRO-GRADE's SJTW jacketing and high-quality inner insulation allows maximum flexibility in temperatures to -58°F (-50°C). These materials also make PRO-GRADE cords extremely water-resistant.

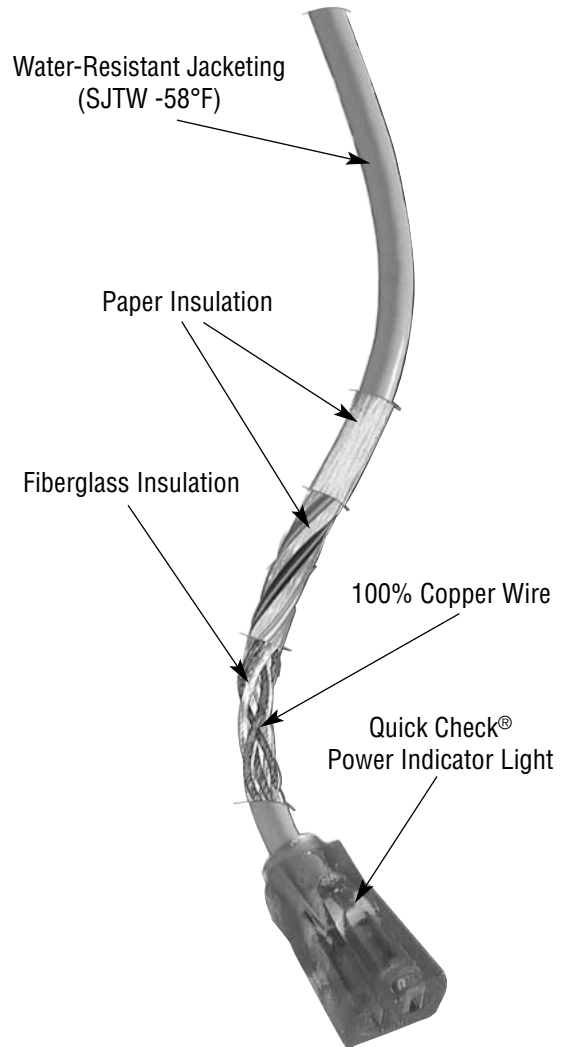

MAXIMUM UTILITY

PRO-GRADE cords are available with 12, 14, and 10 AWG wire so there's a cord to handle any job. You can also choose from a broad line of companion products including a portable GFCI, a three-outlet power block adapter, a work light, power centers and surge protectors, and even 250' spools of wire. The PRO-GRADE program provides a complete line of professional-quality products, all backed up with a lifetime warranty.

QUICK CHECK® POWER INDICATOR LIGHT

When PRO-GRADE cords are connected to a power source, the Quick Check light in the cord's receptacle glows. This tells you that the cord is "live" and adds a level of safety and convenience that ordinary cords can't offer. The Quick Check light glows with a bluish tint that makes it visible even in direct sunlight.

- EXTENSION CORDS
 - U-Ground Connectors
 - Power Block Connectors
 - Locking Connectors
- ACCESSORIES
 - Power Block Adapter
 - Portable GFCI
 - Power Centers
