## SINKS

### BAR SINKS 18-20 GAUGE

### ROUND LAVATORIES 18 GAUGE

### OVAL LAVATORIES 18 GAUGE

### CLASSROOM SINK/DRINKING FOUNTAIN COMBINATION 18 GAUGE

### ADA COMPLAINT CLASSROOM SINKS

### STAINLESS STEEL SINK

**OVERFLOW AVAILABLE.** Overflow assemblies are available on most 18 and 20 gauge single bowls. Model numbers change to include "F" in the prefix, i.e. SL-2225-A-GR becomes SLF-2225-A-GR.

**FINISH.** Interior and top surfaces polished to a fully Hand-Blended Just Finish with highlighted bowl rim.

**DEPTH + RADIUS = CAPACITY.** RADIUS is 1-3/4" on all corners and bottom turns. This, combined with a

STRAIGHT SIDED configuration, allows for a greater functional compartment area. Depths are varied and generous 4" through 12", for maximum available in stock sizes (see specific models).

**STEEL TYPE** Seamlessly die-drawn from nickel bearing type 304, 18-8 stainless steel (18% chrome and 8% nickel content) allows for easy cleaning and stain resistance. The alternative type 316 alloy, contains a molybdenum additive providing greater corrosion resistance to harsher chemicals and acids.

**GAUGES** JUST's quality stainless steel drop-in bowls are available in either 18 or 20 gauge (see specific models).
