Glass Tube Cutters

For cutting glass tube and pipe as well as other brittle tubular materials. These tools are based on the original Wheeler "Squeeze and Pop" principle employing cutter wheels in the chain. Small enough to carry in your pocket and almost as simple to use as a pair of pliers. Just wrap the chain around the tube, and hook the nearest chain pin in the jaw. Then a quick twist of the wrist, a slight squeeze of the handles, and pop! Broken tubing may be trimmed close to the breaks.
